Low pressure immersion pumps with intermediate bearing and bearing carriers for standard motors are characterized by a maintenance-friendly construction. Various immersion depths up to 2,800 mm are available. Therefore the V-series (FV, NV, SV, ZV,

ZHV) can be used in a wide variety of tank installation applications. Several sizes are available to make your design as efficient as possible. Chemically neutral as well as aggressive and abrasive media, e.g. alkaline solutions, solvents and lubricants can be

pumped easily. With over 65 years of experience in industrial pump technology, we are a supplier that guarantees reliable quality products. Give us a call, it will be our pleasure to assist you.
